ELSEVIER

European Journal of Operational Research 138 (2002) 678–680

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

www.elsevier.com/locate/dsw

Contents Volume 138

1 Bootstrapped efficiency estimates for a model for groups and hierarchies in DEA
M. Staat

9 Development and evaluation of an assignment heuristic for allocating cross-trained workers
G.M. Campbell and M. Diaby

21 An exact algorithm for the maximum k-club problem in an undirected graph
J.-M. Bourjolly, G. Laporte and G. Pesant

29 Solving a large-scale industrial scheduling problem using MILP combined with a heuristic procedure
J. Roslöf, I. Harjunkoski, T. Westerlund and J. Isaksson

43 An asymmetric analog of van der Veen conditions and the traveling salesman problem (II)
Y. Oda

63 Controlling inventories with stochastic item returns: A basic model
M. Fleischmann, R. Kuik and R. Dekker

76 Inventory control of service parts in the final phase: A central depot and repair kits
R.H. Teunter and W.K. Klein Haneveld

87 MRP performance effects due to forecast bias and demand uncertainty
S.T. Enns

103 General concepts of quality for discrete-event simulation
S. Robinson

118 Process mean and screening limits for filling processes under two-stage screening procedure
M.K. Lee and E.A. Elsayed

127 Age repair policies for the machine repair problem
M.J. Armstrong

142 Metamodeling: Radial basis functions, versus polynomials
M.F. Hussain, R.R. Barton and S.B. Joshi

155 A computational study on the performance of artificial neural networks under changing structural design and data distribution
P.C. Pendharkar

178 Comparison of fuzzy and crisp systems via system dynamics simulation
S. Polat and C.E. Bozdağ

191 Bayesian neural network learning for repeat purchase modelling in direct marketing
B. Baesens, S. Viaene, D. Van den Poel, J. Vanthienen and G. Dedene

212 Market share analysis using semi-parametric attraction models
H. Hruschka

227 Editorial: MCDA methodologies for classification and sorting
C. Zopounidis

229 Multicriteria classification and sorting methods: A literature review
C. Zopounidis and M. Doumpos

212 Market share analysis using semi-parametric attraction models
H. Hruschka

227 Editorial: MCDA methodologies for classification and sorting
C. Zopounidis

229 Multicriteria classification and sorting methods: A literature review
C. Zopounidis and M. Doumpos

247 Rough sets methodology for sorting problems in presence of multiple attributes and criteria
S. Greco, B. Matarazzo and R. Slowinski
260 Effectiveness evaluation of expert classification methods
O. Larichev, A. Asanov and Y. Naryzhny
274 Construction of rule-based assignment models
R. Azibi and D. Vanderpooten
294 Combining discriminant methods in solving classification problems in two-group discriminant analysis
K.F. Lam and J.W. Moy
302 A multiple objective programming approach for determining faculty salary equity adjustments
M. Sun
320 Electre-like clustering from a pairwise fuzzy proximity index
R. Bisdorff
332 An aggregation/disaggregation approach to obtain robust conclusions with ELECTRE TRI
L. Dias, V. Mousseau, J. Figueira and J. Clímaco
349 A multicriteria assignment procedure for a nominal sorting problematic
J. Léger and J.-M. Martel
365 A multi-profile sorting procedure in the public administration
M.F. Norese and S. Viale
380 Assigning priorities for maintenance, repair and refurbishment in managing a municipal housing stock
C.A. Bana e Costa and R.C. Oliveira
392 Credit risk assessment using a multicriteria hierarchical discrimination approach: A comparative analysis
M. Doumpos, K. Kosmidou, G. Baourakis and C. Zopounidis
413 Policies for data archival in hierarchical storage management
V.S. Mookerjee
436 Genetic programming and rough sets: A hybrid approach to bankruptcy classification
T.E. McKee and T. Lensberg
452 An application of nonlinear optimization in molecular biology
J.G. Ecker, M. Kupferschmid, C.E. Lawrence, A.A. Reilly and A.C.H. Scott
459 The nonlinear knapsack problem – algorithms and applications
K.M. Bretthauer and B. Shetty
473 Using logical surrogate information in Lagrangean relaxation: An application to symmetric traveling salesman problems
L.A.N. Lorena and M. Gonçalves Narciso
484 An algorithm to perform a complete parametric analysis relative to the constraint matrix for a 0–1-integer linear program
A. Crema
495 A hierarchical model for the location of perinatal facilities in the municipality of Rio de Janeiro
R.D. Galvão, L.G. Acosta Espejo and B. Boffey
518 Dynamic scheduling of stochastic jobs on a single machine
W. Jang
531 Using group theory and transition matrices to study a class of metaheuristic neighborhoods
J.W. Barnes, B.W. Colletti and D.L. Neuway
545 Fuzzy inventory problems for perishable commodities
H. Katagiri and H. Ishii

554 An interactive decision support system for on-line process control
K. Rajaram and R. Jaikumar
569 Decomposed vs integrated control of a one-stage production system
A.L.A. Broersma, G. Sierksma and J. Wijngaard
578 Optimal pricing and inventory policies: Centralized and decentralized decision making
S. Jorgensen and P.M. Kort
601 Prescribing product upgrades, prices and production levels over time in a stochastic environment
W.E. Wilhelm and K. Xu
622 Expanding competence sets for the consumer decision problem
T.-Y. Chen
649 A goal programming model for partner selection decisions in international joint ventures
Y.A. Hajidimitriou and A.C. Georgiou
663 Modelling enterprise networks: A master equation approach
D.W. Pearson, P. Albert, B. Besombes, M.-R. Boudarel, E. Marcon and G. Mnemoi
671 A note on "a dual-ascent approach to the fixed-charge capacitated network design problem"
B. Gendron
676 "Measures of grouping efficiency in cellular manufacturing systems" [European Journal of Operational Research 130 (3) (2001) 588–611]
B.R. Sarker
677 "Stochastic analysis of a non-homogeneous Markov system" [European Journal of Operational Research 85 (3) (1995) 670–685]
N. Tsantas
678 Contents Volume 138
